

# Solar Energy

*Solar Energy*, the official journal of the **International Solar Energy Society®**, is devoted exclusively to the science and technology of **solar energy applications**.

ISES is a UN-accredited membership-based NGO founded in 1954. For over 60 years, ISES members from more than 100 countries have undertaken the product research and development that has helped the renewable energy industry to grow. ISES serves as a center for information on research and development in solar energy through its publications and key activities such as annual technical conferences, a free webinar series and dedicated student programmes. The ISES vision statement is: 100% renewable energy for everyone used wisely and efficiently.

## Editor-in-Chief

Professor Ranga Pitchumani,  
Virginia Tech,  
United States of America

*Solar Energy* welcomes manuscripts presenting information not previously published in journals on any aspect of solar energy research, development, application, measurement or policy. The term “solar energy” in this context includes the indirect uses such as wind energy and biomass. Because of the international character of *Solar Energy*, articles that deal solely with the solar radiation or wind data base of a specific country are not normally considered suitable for *Solar Energy*. Submitted manuscripts may take the form of reports of original studies or reviews of significant prior work in a given area. All manuscripts are subject to reviews to assure accuracy, clarity, and long-term value.

ELSEVIER

## SUPPORTS OPEN ACCESS

*Solar Energy* offers authors the option to publish papers open access.
